

Cornell Method Study Guide Template

Course: _____

Exam Date: _____

Chapter / Unit: _____

How the Cornell Method Works

- Notes column: write key facts, definitions, and explanations as you review the material.
- Cues column: after filling in Notes, go back and write a question or keyword for each note - cover the Notes column and quiz yourself using only the cues.
- Summary: in 2-3 sentences, condense the whole page in your own words. This is where the real review happens.
- Repeat the two-column block below for each topic your exam covers.

Topic 1: _____

Cues / Questions	Notes

Summary

Topic 2: _____

Cues / Questions	Notes

Summary

Prefer this filled in automatically? **StudiGEMS** turns your slides, notes, or PDFs into a study guide - summaries, key terms, and practice questions included - in under a minute.
